

BlueStar's Remote Worker and Student Solution Guide

During these unprecedented times BlueStar's portfolio of solutions for remote employees and students can help companies, schools, and healthcare organizations provide secure access for remote individuals and a safe environment for frontline healthcare workers. From connectivity to security, devices, and peripherals we have products to help individuals working remotely.

Advantech - iHealthcare line products with infection control for medical grade AIO computers and Avas video streaming and recording for distance healthcare.

BEC - Home routers and Wi-fi solutions and remote management

Digi - Routers, Wi-fi solutions, and remote management - see attached PDF

Evolve3 - Low cost but powerful 4G LTE enabled Windows based netbooks for students or employees

Mach Networks - Wireless data plans from all carriers with pooling and management

Tripp-Lite - Desktop PDUs and Surge Protection

WatchGuard - Firewalls, Wi-fi, MFA (Multifactor Authentication) and VPN for remote workers - See attached PDF
